

**LOUISIANA DEPARTMENT OF ENVIRONMENTAL QUALITY  
OFFICE OF ENVIRONMENTAL SERVICES**

**STATEMENT OF BASIS<sup>1</sup>**

**PROPOSED PART 70 OPERATING PERMIT 3120-00065-V2**

**Baton Rouge Fractionator and Splitter Units  
Enterprise Products Operating, LLC  
Port Allen, West Baton Rouge Parish, Louisiana  
Agency Interest (AI) No. 40198  
Activity No. PER20090001**

**I. APPLICANT**

The applicant is: Enterprise Products Operating, LLC  
PO Box 4324  
Houston, Texas 77210-4324

Facility: Baton Rouge Fractionator and Splitter Units

SIC Code: 1321 and 2911

Location: 2220 N River Rd  
Port Allen, West Baton Rouge Parish, Louisiana

**II. PERMITTING AUTHORITY**

The permitting authority is: Louisiana Department of Environmental Quality  
Office of Environmental Services  
P.O. Box 4313  
Baton Rouge, Louisiana 70821-4313

**III. CONTACT INFORMATION**

Additional information may be obtained from:

Mr. Dawei Pan  
P.O. Box 4313  
Baton Rouge, Louisiana 70821-4313  
Phone: (225) 219-0930

**IV. FACILITY BACKGROUND AND CURRENT PERMIT STATUS**

The Enterprise Products Operating, LLC - Baton Rouge Baton Rouge Fractionators and Splitter Units currently operate under Permit No. 3120-00065-V1, issued August 5, 2005.

This will be the Part 70 permit renewal/modification for the Baton Rouge Fractionators

---

<sup>1</sup> 40 CFR 70.7(a)(5) and LAC 33:III.531.A.4 require the permitting authority to "provide a statement that sets forth the legal and factual basis for the proposed permit conditions of any permit issued to a Part 70 source, including references to the applicable statutory or regulatory provisions."

## STATEMENT OF BASIS

**Baton Rouge Fractionator and Splitter Units  
Enterprise Products Operating, LLC  
Port Allen, West Baton Rouge Parish, Louisiana  
Agency Interest (AI) Number: 40198  
Activity Number: PER20090001  
Proposed Permit Number: 3120-00065-V2**

and Splitter Units.

This permit addresses all emissions units at the Baton Rouge Fractionators and Splitter Units.

### V. PROPOSED PERMIT/PROJECT INFORMATION

A permit application and Emission Inventory Questionnaire (EIQ) dated September 3, 2009, were received requesting a permit renewal. The application was deemed administratively complete in accordance with LAC 33:III.519.A on November 2, 2009.

Additional information dated September 30, 2009 was also received.

#### **Process Description**

The Baton Rouge Fractionator and Splitter Unit is dual plant configuration consisting of a natural gas liquids fractionators plant and propane/propylene splitter unit.

#### **Baton Rouge Splitter Unit**

The Baton Rouge Splitter in Port Allen, Louisiana separates a mixed propane/propylene feed into separate propane and propylene constituents. This unit is a continuous operation that is divided into four operating sections. These operating sections are the Feed Treating and Dehydration Section, Deethanizer and Propylene Splitter Section, Depropanizer Section, and Hot Oil Section.

*Feed Treating and Dehydration:* The mix of propane and propylene (P/P Mix) arrives at the P/P Splitter Unit by pipeline. This mixture frequently contains sulfur compounds that must be removed prior to further separation. The arriving mixture contacts a filter/coalescer to remove water. Feed then flows through solid KOH treaters to remove hydrogen sulfide, carbonyl sulfide and other sulfur compounds. Spent KOH from the treaters is sent to the waste KOH tank for storage prior to shipment offsite for disposal. Following the sulfur removal, the P/P mix flows through a dehydrator unit to remove moisture.

*Deethanizer and Propylene Splitter:* The feed is then routed to the deethanizer column. Ethane is separated from the feed as overhead product and is condensed by an open loop refrigeration system. Normally the ethane exits the system as a product; however, at times this small stream may be burned in the Heat Recovery System and/or the flare. The flare is a common flare for the Baton Rouge Splitter Unit and the Baton Rouge Fractionator Unit. The deethanizer bottoms are sent to the Propylene Splitter Column. The lighter component, propylene, is stripped off the mixture as overhead. The propylene

## STATEMENT OF BASIS

**Baton Rouge Fractionator and Splitter Units**  
**Enterprise Products Operating, LLC**  
**Port Allen, West Baton Rouge Parish, Louisiana**  
**Agency Interest (AI) Number: 40198**  
**Activity Number: PER20090001**  
**Proposed Permit Number: 3120-00065-V2**

product is condensed using two compressors powered by one gas turbine and one electric motor. The propylene is passed over an adsorption bed that removes arsine and is sent to a pipeline delivery system. The arsine bed is removed when expended and replaced with fresh adsorbent. The spent bed is properly disposed of off-site.

*Depropanizer:* The propane/butane mix coming off the bottom of the splitter column is sent to the depropanizer column where the overhead propane product and the bottom butane mixtures are sent to pipeline delivery system.

*Hot Oil:* The heat needed for accomplishing the product separation in the deethanizer and depropanizer is supplied by a Waste Heat Recovery Unit (WHRU) on the turbine exhaust. The WHRU is capable of firing natural gas and on occasion the deethanizer overhead stream.

### Baton Rouge Fractionator Unit

The Fractionator Unit produces five products from a raw mix Natural Gas Liquid (NGL) feedstream. The five products are ethane, propane, isobutene, n-butane, and natural gasoline. This unit is a continuous operation, which is divided into five operating sections. These operating sections are the Feed Treating, Dehydration and Dethanizer, Depropanizer, Debutanizer, Deisobutanizer, and Refrigeration and Hot Oil.

*Feed Treating, Dehydration and Dethanizer:* Raw mix feed enters as liquid through a filter/coalesce to remove solids and entrained water. After separation from entrained water, the raw mix is treated with an amine solution to remove CO<sub>2</sub>. Raw mix NGL flows into the Deethanizer tower. Ethane vapor is withdrawn from the top of the tower, condensed and pumped to pipeline as product.

*Depropanizer:* Deethanized liquid flows to the Depropanizer tower. Propane vapor is withdrawn from the top of the tower and condensed with cooling water in the overhead condenser. Propane is pumped into pressurized storage. Propane is pumped from storage to pipeline as product.

*Debutanizer:* Bottoms from the Depropanizer flow to the Debutanizer. Butane vapor is withdrawn from the top of the tower, condensed and collected in the Debutanizer Overhead Accumulator. From the accumulator the butane flows into the Deisobutanizer as feed. The Debutanizer bottom stream is cooled and flows through the gasoline treater and then to storage. Gasoline product is pumped from pressurized storage to a pipeline as product.

*Deisobutanizer:* Deisobutanizer accepts feed from the debutanizer overhead. Isobutanizer

## STATEMENT OF BASIS

**Baton Rouge Fractionator and Splitter Units  
Enterprise Products Operating, LLC  
Port Allen, West Baton Rouge Parish, Louisiana  
Agency Interest (AI) Number: 40198  
Activity Number: PER20090001  
Proposed Permit Number: 3120-00065-V2**

vapor is withdrawn from the top of the tower and compressed. The deisobutanizer bottom stream is cooled in the n-butane product cooler and flows to storage. Isobutane and n-butane products are pumped from storage into pipeline as products.

*Refrigeration and Hot Oil:* A two-stage, propane refrigeration system supplies cooling to the process. Low pressure refrigerant is used to condense reflux for the Deethanizer and product ethane. Water coolers are used to condense propane, and the compressor is driven by a gas turbine. An auxiliary fired, waste heat recovery hot oil heater produces hot oil for process heat. This is a single unit which accepts exhaust flow from the gas turbine.

### Proposed Modifications

This renewal permit includes the following changes and updates needed to reconcile the permit:

1. Updated all emission calculations with current methodologies;
2. Established separated facility identifications for the supplemental gas-fired waste heat recovery units (WHRU);
3. Updated the insignificant source listing.

## VI. ATTAINMENT STATUS OF PARISH

<u>Pollutant</u>	<u>Attainment Status</u>	<u>Designation</u>
PM <sub>2.5</sub>	Attainment	N/A
PM <sub>10</sub>	Attainment	N/A
SO <sub>2</sub>	Attainment	N/A
NO <sub>2</sub>	Attainment	N/A
CO	Attainment	N/A
Ozone <sup>2</sup>	Nonattainment	Moderate
Lead	Attainment	N/A

## VII. PERMITTED AIR EMISSIONS

Sources of air emissions are listed on the "Inventories" page of the proposed permit.

Estimated emissions of criteria pollutants from the facility, in tons per year (TPY), are as follows:

---

<sup>2</sup> VOC and NO<sub>x</sub> are regulated as surrogates.

## STATEMENT OF BASIS

**Baton Rouge Fractionator and Splitter Units**  
**Enterprise Products Operating, LLC**  
**Port Allen, West Baton Rouge Parish, Louisiana**  
**Agency Interest (AI) Number: 40198**  
**Activity Number: PER20090001**  
**Proposed Permit Number: 3120-00065-V2**

<u>Pollutant</u>	<u>Before</u>	<u>After</u>	<u>Change</u>
PM <sub>10</sub>	46.18	22.07	-24.11
SO <sub>2</sub>	1.93	18.65	+16.72
NO <sub>x</sub>	124.53	115.89	-8.64
CO	154.22	229.52	+75.30
VOC	54.37	73.12	+18.75

PM<sub>10</sub> and VOC compounds classified as LAC 33:III.Chapter 51-regulated toxic air pollutants (TAP) are speciated below. This list encompasses all Hazardous Air Pollutants (HAP) regulated pursuant to Section 112 of the Clean Air Act. Note, however, all TAPs are not HAPs (e.g., ammonia, hydrogen sulfide).

<u>Pollutant</u>	<u>Before</u>	<u>After</u>	<u>Change</u>
Acetaldehyde	0.016	0.014	-0.002
Acrolein	0.002	0.002	-
Benzene	0.007	0.007	-
Dichlorobenzene	0.001	0.001	-
Ethylbenzene	0.012	0.018	+0.006
Formaldehyde	0.350	0.528	+0.178
Hexane	1.700	0.119	-1.581
Naphthalene	<0.001	<0.001	-
PAH	<0.001	<0.001	-
Propylene Oxide	0.012	0.010	-0.002
Toluene	0.055	0.163	+0.108
Xylene	0.026	0.043	+0.017

Baton Rouge Fractionator and Splitter Units are major sources of criteria pollutants, minor sources of HAPs, and minor sources of TAPs.

Permitted limits for individual emissions units and groups of emissions units, if applicable, are set forth in the tables of the proposed permit entitled "Emission Rates for Criteria Pollutants" and "Emission Rates for TAP/HAP & Other Pollutants." These tables are part of the permit.

Emissions calculations can be found in Appendix A of the permit application. The calculations address the manufacturer's specifications, fuel composition (e.g., sulfur content), emissions factors, and other assumptions on which the emissions limitations are based and have been reviewed by the permit writer for accuracy.

## STATEMENT OF BASIS

**Baton Rouge Fractionator and Splitter Units  
Enterprise Products Operating, LLC  
Port Allen, West Baton Rouge Parish, Louisiana  
Agency Interest (AI) Number: 40198  
Activity Number: PER20090001  
Proposed Permit Number: 3120-00065-V2**

### General Condition XVII Activities

Very small emissions to the air resulting from routine operations that are predictable, expected, periodic, and quantifiable and that are submitted by the applicant and approved by the Air Permits Division are considered authorized discharges. These releases are not included in the permit totals because they are small and will have an insignificant impact on air quality. However, such emissions are considered when determining the facility's potential to emit for evaluation of applicable requirements. Approved General Condition XVII activities are noted in Section VIII of the proposed permit.

### Insignificant Activities

The emissions units or activities listed in Section IX of the proposed permit have been classified as insignificant pursuant to LAC 33:III.501.B.5. By such listing, the LDEQ exempts these sources or types of sources from the requirement to obtain a permit under LAC 33:III.Chapter 5. However, such emissions are considered when determining the facility's potential to emit for evaluation of applicable requirements.

## VIII. REGULATORY APPLICABILITY

Regulatory applicability is discussed in three sections of the proposed permit: Section X (Table 1), Section XI (Table 2), and Specific Requirements. Each is discussed in more detail below.

### Section X (Table 1): Applicable Louisiana and Federal Air Quality Requirements

Section X (Table 1) summarizes all applicable federal and state regulations. In the matrix, a "1" represents a regulation applies to the emissions unit. A "1" is also used if the emissions unit is exempt from the emissions standards or control requirements of the regulation, but monitoring, recordkeeping, and/or reporting requirements apply.

A "2" is used to note that the regulation has requirements that would apply to the emissions unit, but the unit is exempt from these requirements due to meeting a specific criterion, such as it has not been constructed, modified, or reconstructed since the regulation has been effective. If the specific criterion changes, the emissions unit will have to comply at a future date. Each "2" entry is explained in Section XI (Table 2).

A "3" signifies that the regulation applies to this general type of source (e.g., furnace, distillation column, boiler, fugitive emissions, etc.), but does not apply to the particular emissions unit. Each "3" entry is explained in Section XI (Table 2).

If blank, the regulation clearly does not apply to this type of emissions unit.

### Section XI (Table 2): Explanation for Exemption Status or Non-Applicability of a Source

Section XI (Table 2) of the proposed permit provides explanation for either the

## STATEMENT OF BASIS

**Baton Rouge Fractionator and Splitter Units  
Enterprise Products Operating, LLC  
Port Allen, West Baton Rouge Parish, Louisiana  
Agency Interest (AI) Number: 40198  
Activity Number: PER20090001  
Proposed Permit Number: 3120-00065-V2**

exemption status or non-applicability of given federal or state regulation cited by 2 or 3 in the matrix presented in Section X (Table 1).

### Specific Requirements

Applicable regulations, as well as any additional monitoring, recordkeeping, and reporting requirements necessary to demonstrate compliance with both the federal and state terms and conditions of the proposed permit, are provided in the “Specific Requirements” section. Any operating limitations (e.g., on hours of operation or throughput) are also set forth in this section. Associated with each Specific Requirement is a citation of the federal or state regulation upon which the authority to include that Specific Requirement is based.

### **1. Federal Regulations**

#### 40 CFR 60 – New Source Performance Standards (NSPS)

The following subparts are applicable at the Baton Rouge Fractionator and Splitter Units: A, GG, Db, VV, KKK, and NNN. Applicable emission standards, monitoring, test methods and procedures, recordkeeping, and reporting requirements are summarized in the “Specific Requirements” section of the proposed permit.

#### 40 CFR 61 – National Emission Standards for Hazardous Air Pollutants (NESHAP)

No NESHAP provisions are applicable to the Baton Rouge Fractionator and Splitter Units.

#### 40 CFR 63 – Maximum Achievable Control Technology (MACT)

No MACT provisions are applicable to the Baton Rouge Fractionator and Splitter Units.

#### Clean Air Act §112(g) or §112(j) – Case-By-Case MACT Determinations

A case-by-case MACT determination pursuant to §112(g) or §112(j) of the Clean Air Act was not required.

#### 40 CFR 64 – Compliance Assurance Monitoring (CAM)

Per 40 CFR 64.2(a), CAM applies to each pollutant-specific emissions unit (PSEU) that 1) is subject to an emission limitation or standard, 2) uses a control devices to achieve compliance, and 3) has potential pre-control device emissions that are equal to or greater than 100 percent of the amount, in TPY, required for a source to be classified as a major source.

Baton Rouge Fractionator and Splitter Units are not subject to CAM.

## STATEMENT OF BASIS

**Baton Rouge Fractionator and Splitter Units  
Enterprise Products Operating, LLC  
Port Allen, West Baton Rouge Parish, Louisiana  
Agency Interest (AI) Number: 40198  
Activity Number: PER20090001  
Proposed Permit Number: 3120-00065-V2**

### Acid Rain Program

The Acid Rain Program, 40 CFR Part 72 – 78, applies to the fossil fuel-fired combustion devices listed in Tables 1-3 of 40 CFR 73.10 and other utility units, unless a unit is determined not to be an affected unit pursuant to 40 CFR 72.6(b). LDEQ has incorporated the Acid Rain Program by reference at LAC 33:III.505. Baton Rouge Fractionator and Splitter Units are not subject to the Acid Rain Program.

### **2. SIP-Approved State Regulations**

Applicable state regulations are also noted in Section X (Table 1) of the proposed permit. Some state regulations have been approved by the U.S. Environmental Protection Agency (EPA) as part of Louisiana's State Implementation Plan (SIP). These regulations are referred to as "SIP-approved" and are enforceable by both LDEQ and EPA. All LAC 33:III.501.C.6 citations are federally enforceable unless otherwise noted.

### **3. State-Only Regulations**

Individual chapters or sections of LAC 33:III noted by an asterisk in Section X (Table 1) are designated "state-only" pursuant to 40 CFR 70.6(b)(2). Terms and conditions of the proposed permit citing these chapters or sections are not SIP-approved and are not subject to the requirements of 40 CFR Part 70. These terms and conditions are enforceable by LDEQ, but not EPA. All conditions not designated as "state-only" are presumed to be federally enforceable.

## **IX. NEW SOURCE REVIEW (NSR)**

### **1. Prevention of Significant Deterioration (PSD)**

The Fractionator Unit's source category is not listed in Table A of the definition of "major stationary source" in LAC 33:III.509. As such, the PSD major source threshold is 100 TPY (of any regulated NSR pollutant). However, the Splitter Unit's source category is listed in Table A of the definition of "major stationary source" in LAC 33:III.509. As such, the PSD major source threshold is 250 TPY (of any regulated NSR pollutant).

The Fractionator Unit is not classified as a major stationary source under the PSD program. Thus, PSD review is not required.

The Splitter Unit is a major stationary source under the PSD program, LAC 33:III.509. However, there are no physical changes or changes in the method of operation associated with this permit modification.

### **2. Nonattainment New Source Review (NNSR)**

Baton Rouge Fractionator and Splitter Units are major stationary sources under the NNSR program, LAC 33:III.504. However, there are no physical changes or changes in

## STATEMENT OF BASIS

**Baton Rouge Fractionator and Splitter Units  
Enterprise Products Operating, LLC  
Port Allen, West Baton Rouge Parish, Louisiana  
Agency Interest (AI) Number: 40198  
Activity Number: PER20090001  
Proposed Permit Number: 3120-00065-V2**

the method of operation associated with this permit modification.

### 3. Notification of Federal Land Manager

The Federal Land Manager (FLM) is responsible for evaluating a facility's projected impact on the Air Quality Related Values (AQRV) (e.g., visibility, sulfur and nitrogen deposition, any special considerations concerning sensitive resources, etc.<sup>3</sup>) and recommending that LDEQ either approve or disapprove the facility's permit application based on anticipated impacts. The FLM also may suggest changes or conditions on a permit. However, LDEQ makes the final decision on permit issuance. The FLM also advises reviewing agencies and permit applicants about other FLM concerns, identifies AQRV and assessment parameters for permit applicants, and makes ambient monitoring recommendations.

If LDEQ receives a PSD or NNSR permit application for a facility that "may affect" a Class I area, the FLM charged with direct responsibility for managing these lands is notified.

The meaning of the term "may affect" is interpreted by EPA policy to include all major sources or major modifications which propose to locate within 100 kilometers (km) of a Class I area. However, if a major source proposing to locate at a distance greater than 100 km is of such size that LDEQ or the FLM is concerned about potential impacts on a Class I area, LDEQ can ask the applicant to perform an analysis of the source's potential emissions impacts on the Class I area. This is because certain meteorological conditions, or the quantity or type of air emissions from large sources located further than 100 km, may cause adverse impacts. In order to determine whether a source located further than 100 km may affect a Class I area, LDEQ uses the Q/d approach.

Q/d refers to the ratio of the sum of the net emissions increase (in tons) of PM<sub>10</sub>, SO<sub>2</sub>, NO<sub>x</sub>, and H<sub>2</sub>SO<sub>4</sub> to the distance (in kilometers) of the facility from the nearest boundary of the Class I area.

$$Q/d = \frac{PM_{10} (NEI) + SO_2 (NEI) + NO_x (NEI) + H_2SO_4 (NEI)^4}{\text{Class I km}}$$

Where:

PM <sub>10</sub> (NEI)	=	net emissions increase of PM <sub>10</sub>
SO <sub>2</sub> (NEI)	=	net emissions increase of SO <sub>2</sub>
NO <sub>x</sub> (NEI)	=	net emissions increase of NO <sub>x</sub>

<sup>3</sup> See <http://www2.nature.nps.gov/air/Permits/ARIS/AQRV.cfm>.

<sup>4</sup> If both NNSR and PSD review are required, the higher of the two "net emissions increase" values has been selected. The net emissions increase for NNSR and PSD purposes may be different due to differing contemporaneous periods. If the net emissions increase of any pollutant is negative, the value used in the equation has been set to zero. If the project did not trigger a netting analysis, LDEQ uses the project increase (see §504.A.3 (NNSR) and §509.A.4 (PSD)). In this case, the value will be less than the pollutant's significance level.

## STATEMENT OF BASIS

**Baton Rouge Fractionator and Splitter Units  
Enterprise Products Operating, LLC  
Port Allen, West Baton Rouge Parish, Louisiana  
Agency Interest (AI) Number: 40198  
Activity Number: PER20090001  
Proposed Permit Number: 3120-00065-V2**

$H_2SO_4$  (NEI) = net emissions increase of  $H_2SO_4$   
Class I km = distance to nearest Class I area (in kilometers)

If  $Q/d \geq 4$ , LDEQ will formally notify the FLM in accordance with LAC 33:III.504.E.1 / LAC 33:III.509.P.1.

In this instance,

$$Q/d = \frac{\text{_____} + \text{_____} + \text{_____} + \text{_____}}{\text{_____}} =$$

Therefore, LDEQ has determined that the proposed project will not adversely impact visibility in Breton National Wildlife Refuge/Caney Creek Wilderness Area, the nearest Class I area.

#### 4. Reasonable Possibility

As previously mentioned, increases of PM/PM<sub>10</sub>, SO<sub>2</sub>, CO, and VOC associated with the proposed project did not trigger PSD/NNSR review. Because the applicant elected to use "potential to emit" in lieu of "projected actual emissions" to determine the project increase, there is no "reasonable possibility" that the proposed project may result in a significant emissions increase.

#### X. ADDITIONAL MONITORING AND TESTING REQUIREMENTS

In addition to the monitoring and testing requirements set forth by applicable state and federal regulations (see Section VIII of this Statement of Basis), a number of "LAC 33:III.507.H.1.a" and/or "LAC 33:III.501.C.6" conditions may appear in the "Specific Requirements" section of the proposed permit. These conditions have been added where no applicable regulation exists or where an applicable regulation does not contain sufficient monitoring, recordkeeping, and/or reporting provisions to ensure compliance. LAC 33:III.507.H.1.a provisions, which may include recordkeeping requirements, are intended to fulfill Part 70 periodic monitoring obligations under 40 CFR 70.6(a)(3)(i)(B).

<u>ID</u>	<u>Description</u>	<u>Pollutant</u>	<u>Method</u>	<u>Frequency</u>
-----------	--------------------	------------------	---------------	------------------

#### XI. OPERATIONAL FLEXIBILITY

##### Emissions Caps

An emissions cap is a permitting mechanism to limit allowable emissions of two or more emissions units below their collective potential to emit (PTE). The proposed permit does not establish an emissions cap.

## STATEMENT OF BASIS

**Baton Rouge Fractionator and Splitter Units  
Enterprise Products Operating, LLC  
Port Allen, West Baton Rouge Parish, Louisiana  
Agency Interest (AI) Number: 40198  
Activity Number: PER20090001  
Proposed Permit Number: 3120-00065-V2**

### Alternative Operating Scenarios

LAC 33:III.507.G.5 allows the owner or operator to operate under any operating scenario incorporated in the permit. Any reasonably anticipated alternative operating scenarios may be identified by the owner or operator through a permit application and included in the permit. The proposed permit does not include an alternative operating scenario.

### Streamlined Requirements

When applicable requirements overlap or conflict, the permitting authority may choose to include in the permit the requirement that is determined to be most stringent or protective as detailed in EPA's "White Paper Number 2 for Improved Implementation of the Part 70 Operating Permits Program" (March 5, 1996). The overall objective is to determine the set of permit terms and conditions that will assure compliance with all applicable requirements for an emissions unit or group of emissions units so as to eliminate redundant or conflicting requirements. The proposed permit does not contain streamlined provisions.

### *Louisiana Consolidated Fugitive Emission Program (LCFEP)*

Baton Rouge Fractionator and Splitter Units do not comply with a streamlined equipment leak monitoring program.

## **XII. PERMIT SHIELD**

A permit shield, as described in 40 CFR 70.6(f) and LAC 33:III.507.I, provides an "enforcement shield" which protects the facility from enforcement action for violations of applicable federal requirements. It is intended to protect the facility from liability for violations if the permit does not accurately reflect an applicable federal or federally enforceable requirement.

The proposed permit does not establish a permit shield.

## **XIII. IMPACTS ON AMBIENT AIR**

Emissions associated with the proposed facility were reviewed by the Air Quality Assessment Division to ensure compliance with the NAAQS and AAS. LDEQ did not require the applicant to model emissions.

## **XIV. COMPLIANCE HISTORY AND CONSENT DECREES**

No federal or state actions have been issued since the existing permit for the Baton Rouge Fractionator and Splitter Units was issued.

## STATEMENT OF BASIS

**Baton Rouge Fractionator and Splitter Units  
Enterprise Products Operating, LLC  
Port Allen, West Baton Rouge Parish, Louisiana  
Agency Interest (AI) Number: 40198  
Activity Number: PER20090001  
Proposed Permit Number: 3120-00065-V2**

### XV. REQUIREMENTS THAT HAVE BEEN SATISFIED

The following state and/or federal obligations have been satisfied and are therefore not included as Specific Requirements.

<u>Source ID</u>	<u>Citation</u>	<u>Description</u>
None		

### XVI. OTHER REQUIREMENTS

Executive Order No. BJ 2008-7 directs all state agencies to administer their regulatory practices, programs, contracts, grants, and all other functions vested in them in a manner consistent with Louisiana's Comprehensive Master Plan for a Sustainable Coast and public interest to the maximum extent possible. If a proposed facility or modification is located in the Coastal Zone, LDEQ requires the applicant to document whether or not a Coastal Use Permit is required, and if so, whether it has been obtained. Coastal Use Permits are issued by the Coastal Management Division of the Louisiana Department of Natural Resources (LDNR).

The facility is not located in the Coastal Zone; therefore, a Coastal Use Permit is not required.

### XVII. PUBLIC NOTICE/PUBLIC PARTICIPATION

Written comments, written requests for a public hearing, or written requests for notification of the final decision regarding this permit action may be submitted to:

Ms. Soumaya Ghosn  
LDEQ, Public Participation Group  
P.O. Box 4313  
Baton Rouge, Louisiana 70821-4313

Written comments and/or written requests must be received prior to the deadline specified in the public notice. If LDEQ finds a significant degree of public interest, a public hearing will be held. All comments will be considered prior to a final permit decision.

LDEQ will send notification of the final permit decision to the applicant and to each person who has submitted written comments or a written request for notification of the final decision.

## STATEMENT OF BASIS

**Baton Rouge Fractionator and Splitter Units

Proposed Permit Number: 3120-00065-V2**

The permit application, proposed permit, and this Statement of Basis are available for review at LDEQ, Public Records Center, Room 127, 602 North 5th Street, Baton Rouge, Louisiana. Viewing hours are from 8:00 a.m. to 4:30 p.m., Monday through Friday (except holidays). Additional copies may be viewed at the local library identified in the public notice. The available information can also be accessed electronically via LDEQ's Electronic Document Management System (EDMS) on LDEQ's public website, [www.deq.louisiana.gov](http://www.deq.louisiana.gov).

Inquiries or requests for additional information regarding this permit action should be directed to the contact identified on page 1 of this Statement of Basis.

Persons wishing to be included on the public notice mailing list or for other public participation-related questions should contact LDEQ's Public Participation Group at P.O. Box 4313, Baton Rouge, LA 70821-4313; by e-mail at [maillistrequest@ldeq.org](mailto:maillistrequest@ldeq.org); or contact LDEQ's Customer Service Center at (225) 219-LDEQ (219-5337). Alternatively, individuals may elect to receive public notices via e-mail by subscribing to LDEQ's Public Notification List Service at [http://www.doa.louisiana.gov/oes/listservpage/ldeq\\_pn\\_listserv.htm](http://www.doa.louisiana.gov/oes/listservpage/ldeq_pn_listserv.htm).

Permit public notices can be viewed at LDEQ's "Public Notices" webpage, <http://www.deq.louisiana.gov/apps/pubNotice/default.asp>. Electronic access to each proposed permit and Statement of Basis current on notice is also available on this page. General information related to public participation in permitting activities can be viewed at [www.deq.louisiana.gov/portal/tabid/2198/Default.aspx](http://www.deq.louisiana.gov/portal/tabid/2198/Default.aspx).

## STATEMENT OF BASIS

**Baton Rouge Fractionator and Splitter Units  
Enterprise Products Operating, LLC  
Port Allen, West Baton Rouge Parish, Louisiana  
Agency Interest (AI) Number: 40198  
Activity Number: PER20090001  
Proposed Permit Number: 3120-00065-V2**

## APPENDIX A - ACRONYMS

AAS	Ambient Air Standard (LAC 33:III.Chapter 51)
AP-42	EPA document number of the Compilation of Air Pollutant Emission Factors
BACT	Best Available Control Technology
BTU	British Thermal Units
CAA	Clean Air Act
CAAA	Clean Air Act Amendments
CAM	Compliance Assurance Monitoring, 40 CFR 64
CEMS	Continuous Emission Monitoring System
CMS	Continuous Monitoring System
CO	Carbon monoxide
COMS	Continuous Opacity Monitoring System
CFR	Code of Federal Regulations
EI	Emissions Inventory (LAC 33:III.919)
EPA	(United States) Environmental Protection Agency
EQ	Emission Inventory Questionnaire
ERC	Emission Reduction Credit
FR	Federal Register or Fixed Roof
H <sub>2</sub> S	Hydrogen sulfide
H <sub>2</sub> SO <sub>4</sub>	Sulfuric acid
HAP	Hazardous Air Pollutants
Hg	Mercury
HON	Hazardous Organic NESHAP
IBR	Incorporation by Reference
LAER	Lowest Achievable Emission Rate
LDEQ	Louisiana Department of Environmental Quality
M	Thousand
MM	Million
MACT	Maximum Achievable Control Technology
MEK	Methyl ethyl ketone
MIK	Methyl isobutyl ketone
MSDS	Material Safety Data Sheet
MTBE	Methyl tert-butyl ether
NAAQS	National Ambient Air Quality Standards
NAICS	North American Industrial Classification System (replacement to SIC)
NESHAP	National Emission Standards for Hazardous Air Pollutants
NMOC	Non-Methane Organic Compounds

## STATEMENT OF BASIS

**Baton Rouge Fractionator and Splitter Units  
Enterprise Products Operating, LLC  
Port Allen, West Baton Rouge Parish, Louisiana  
Agency Interest (AI) Number: 40198  
Activity Number: PER20090001  
Proposed Permit Number: 3120-00065-V2**

## APPENDIX A - ACRONYMS

NOx	Nitrogen Oxides
NNSR	Nonattainment New Source Review
NSPS	New Source Performance Standards
NSR	New Source Review
OEA	LDEQ Office of Environmental Assessment
OEC	LDEQ Office of Environmental Compliance
OES	LDEQ Office of Environmental Services
PM	Particulate Matter
PM10	Particulate Matter less than 10 microns in nominal diameter
PM2.5	Particulate Matter less than 2.5 microns in nominal diameter
ppm	parts per million
ppmv	parts per million by volume
ppmw	parts per million by weight
PSD	Prevention of Significant Deterioration
PTE	Potential to Emit
RACT	Reasonably Available Control Technology
RBLC	RACT-BACT-LAER Clearinghouse
RMP	Risk Management Plan (40 CFR 68)
SICC	Standard Industrial Classification Code
SIP	State Implementation Plan
SO2	Sulfur Dioxide
SOCMI	Synthetic Organic Chemical Manufacturing Industry
TAP	Toxic Air Pollutants (LAC 33:III.Chapter 51)
TOC	Total Organic Compounds
TPY	Tons Per Year
TRS	Total Reduced Sulfur
TSP	Total Suspended Particulate
µg/m <sup>3</sup>	Micrograms per Cubic Meter
UTM	Universal Transverse Mercator
VOC	Volatile Organic Compound
VOL	Volatile Organic Liquid
VRU	Vapor Recovery Unit

## STATEMENT OF BASIS

**Baton Rouge Fractionator and Splitter Units  
Enterprise Products Operating, LLC  
Port Allen, West Baton Rouge Parish, Louisiana  
Agency Interest (AI) Number: 40198  
Activity Number: PER20090001  
Proposed Permit Number: 3120-00065-V2**

## APPENDIX B – GLOSSARY

*Best Available Control Technologies (BACT)* – an emissions limitation (including a visible emission standard) based on the maximum degree of reduction for each pollutant subject to regulation under this Part (Part III) which would be emitted from any proposed major stationary source or major modification which the administrative authority, on a case-by-case basis, taking into account energy, environmental, and economic impacts and other costs, determines is achievable for such source or modification through application of production processes or available methods, systems, and techniques, including fuel cleaning or treatment or innovative fuel combustion techniques for control of such pollutant.

*CAM - Compliance Assurance Monitoring* – A federal air regulation under 40 CFR Part 64.

*Carbon Monoxide (CO)* – (Carbon monoxide) a colorless, odorless gas produced by incomplete combustion of any carbonaceous (gasoline, natural gas, coal, oil, etc.) material.

*Cooling Tower* – A cooling system used in industry to cool hot water (by partial evaporation) before reusing it as a coolant.

*Continuous Emission Monitoring System (CEMS)* – The total combined equipment and systems required to continuously determine air contaminants and diluent gas concentrations and/or mass emission rate of a source effluent.

*Cyclone* – A control device that uses centrifugal force to separate particulate matter from the carrier gas stream.

*Federally Enforceable Specific Condition* – A federally enforceable specific condition written to limit the potential to Emit (PTE) of a source that is permanent, quantifiable, and practically enforceable. In order to meet these requirements, the draft permit containing the federally enforceable specific condition must be placed on public notice and include the following conditions:

- A clear statement of the operational limitation or condition which limits the source's potential to emit;
- Recordkeeping requirements related to the operational limitation or condition;
- A requirement that these records be made available for inspection by LDEQ personnel;
- A requirement to report for the previous calendar year.

*Grandfathered Status* – those facilities that were under actual construction or operation as of June 19, 1969, the signature date of the original Clean Air Act. These facilities are not required to obtain a permit. Facilities that are subject to Part 70 (Title V) requirements lose grandfathered status and must apply for a permit.

## STATEMENT OF BASIS

**Baton Rouge Fractionator and Splitter Units  
Enterprise Products Operating, LLC  
Port Allen, West Baton Rouge Parish, Louisiana  
Agency Interest (AI) Number: 40198  
Activity Number: PER20090001  
Proposed Permit Number: 3120-00065-V2**

## APPENDIX B – GLOSSARY

*Lowest Achievable Emission Rate (LAER)* – for any source, the more stringent rate of emissions based on the following:

- a. the most stringent emissions limitation that is contained in the implementation plan of any state for such class or category of major stationary source, unless the owner or operator of the proposed stationary source demonstrates that such limitations are not achievable; or
- b. the most stringent emissions limitation that is achieved in practice by such class or category of stationary source. This limitation, when applied to a modification, means the lowest achievable emissions rate for the new or modified emissions units within the stationary source. In no event shall the application of this term permit a proposed new or modified major stationary source to emit any pollutant in excess of the amount allowable under an applicable new source standard of performance.

*NESHAP* – National Emission Standards for Hazardous Air Pollutants – Air emission standards for specific types of facilities, as outlined in 40 CFR Parts 61 through 63.

*Maximum Achievable Control Technology (MACT)* – the maximum degree of reduction in emissions of each air pollutant subject to LAC 33:III.Chapter 51 (including a prohibition on such emissions, where achievable) that the administrative authority, upon review of submitted MACT compliance plans and other relevant information and taking into consideration the cost of achieving such emission reduction, as well as any non-air-quality health and environmental impacts and energy requirements, determines is achievable through application of measures, processes, methods, systems, or techniques.

*NSPS* – New Source Performance Standards – Air emission standards for specific types of facilities, as outlined in 40 CFR Part 60.

*New Source Review (NSR)* – a preconstruction review and permitting program applicable to new or modified major stationary sources of criteria air pollutants regulated under the Clean Air Act (CAA). NSR is required by Parts C (“Prevention of Significant Deterioration of Air Quality”) and D (“Nonattainment New Source Review”).

*Nonattainment New Source Review (NNSR)* – a New Source Review permitting program for major sources in geographic areas that do not meet the National Ambient Air Quality Standards (NAAQS) set forth at 40 CFR Part 50. NNSR is designed to ensure that emissions associated with new or modified sources will be regulated with the goal of improving ambient air quality.

*Organic Compound* – any compound of carbon and another element. Examples: methane (CH<sub>4</sub>), ethane (C<sub>2</sub>H<sub>6</sub>), carbon disulfide (CS<sub>2</sub>).

*Part 70 Operating Permit* – also referred to as a Title V permit, required for major sources as defined in 40 CFR 70 and LAC 33:III.507.

## STATEMENT OF BASIS

**Baton Rouge Fractionator and Splitter Units  
Enterprise Products Operating, LLC  
Port Allen, West Baton Rouge Parish, Louisiana  
Agency Interest (AI) Number: 40198  
Activity Number: PER20090001  
Proposed Permit Number: 3120-00065-V2**

## APPENDIX B – GLOSSARY

*PM<sub>10</sub>* – particulate matter with an aerodynamic diameter less than or equal to a nominal 10 micrometers as measured by the method in Title 40, Code of Federal Regulations, Part 50, Appendix J.

*Potential to Emit (PTE)* – the maximum capacity of a stationary source to emit any air pollutant under its physical and operational design.

*Prevention of Significant Deterioration (PSD)* – a New Source Review permitting program for major sources in geographic areas that meet the National Ambient Air Quality Standards (NAAQS) at 40 CFR Part 50. PSD requirements are designed to ensure that the air quality in attainment areas will not degrade.

*Selective Catalytic Reduction (SCR)* – A non-combustion control technology that destroys NO<sub>x</sub> by injecting a reducing agent (e.g., ammonia) into the flue gas that, in the presence of a catalyst (e.g., vanadium, titanium, or zeolite), converts NO<sub>x</sub> into molecular nitrogen and water.

*Sulfur Dioxide (SO<sub>2</sub>)* – An oxide of sulphur.

*TAP* – LDEQ acronym for toxic air pollutants regulated under LAC 33 Part III, Chapter 51, Tables 1 through 3.

*“Top Down” Approach* – An approach which requires use of the most stringent control technology found to be technically feasible and appropriate based on environmental, energy, economic, and cost impacts.

*Title V permit* – see Part 70 Operating Permit.

*Volatile Organic Compound (VOC)* – any organic compound which participates in atmospheric photochemical reactions; that is, any organic compound other than those which the Administrator of the U.S. Environmental Protection Agency designates as having negligible photochemical reactivity.
